LET YOUR BUILDING BREATHE!

MIGUSHIELD

LET YOUR BUILDING BREATHE - WITH MIGUSHIELD, THE NEW RANGE OF ARCHITECTURAL LOUVERS

MIGUSHIELD Architectural Louvers are designed to protect your building and mechanical equipment from rain, storms, noise and sand, while ensuring optimal indoor air circulation by letting in fresh air. Our Architectural Louvers are individually tailored to your requirements and meet highest aesthetic demands.

TWO TYPES OF LOUVERS ARE AT YOUR DISPOSAL:

MIGUSHIELD Performance Louvers and
MIGUSHIELD Louvered Vision Screens.

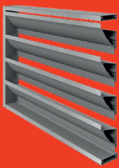

JOINT FORCES

OVER 100 YEARS OF EXPERIENCE IN EXPANSION JOINT COVER SYSTEMS MEETS 25 YEARS OF LOUVERS EXPERTISE

Together, that's more than 125 years of experience in customer service, innovation and the highest quality standards. In collaboration with our Canadian partner Ten Plus, we have created the perfect base to expand our MIGUA product range with Architectural Louvers.

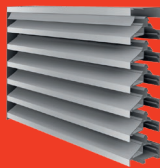

Experience the well-known MIGUA quality in combination with our new MIGUSHIELD product line!

SYSTEMS

LOUVERED VISION SCREENS

Designed to conceal undesirable view by creating a sight barrier whilst maintaining constant airflow.

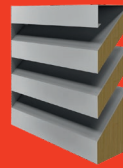

STORM RESISTANT LOUVERS

Designed to provide high volume intake, exhaust ventilation, and to prevent water penetration under extreme wind driven rain conditions, hurricanes, storms, etc.

DRAINABLE LOUVERS

Designed to reduce water penetration from non-wind driven rain. Blade gutters channel direct water sitting on the blades to vertical channels.

ACOUSTICAL LOUVERS

Designed to dampen the noise while letting enough air in to keep the normal plant operation.

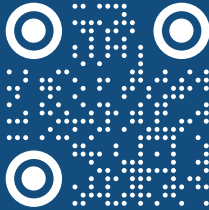

SAND TRAP LOUVERS

Designed to shield HVAC equipment from wind-driven sand which may move through the building facades.
