FOR HEAVY DUTY FLOORS

MIGUTRANS

HEAVY-DUTY ALL-METAL JOINT SOLUTIONS FOR LARGE TRAFFIC LOADS

Improved transit over joints reduces wear on wheels

Super efficient design for smoother transit and even load dristribution

Visible surface has no gaps

avoids dirt accumulation, easy cleaning

Minimal vibration when trafficked more efficient and safer work environment

Now available Anodized!

This expansion joint cover is on offer in anodized colours as of now. Available as standard in the four colours shown below, we will be pleased to offer you further colours upon request.

Production length: 4 m

Standard colour: Aluminium, SFS 90 also available anodised. Larger installation heights on request.

Applicable for anodized expansion joint covers:

By anodizing the surface is hardened, but scratches can not be ruled out under mechanical stress of the profiles. Slight color and / or gloss deviations between different batches or deliveries do

not constitute a reason for complaint. The processing is carried out in accordance with DIN 17611 and the Qualanod (Quality Label for Sulphuric Acid-Based Anodizing of Aluminium) regulations for the anodization of aluminum. The expansion joint covers must be cleaned and maintained in accordance with the specifications of the Qualanod and the leaflet A5 of the aluminum center. We are happy to advise you.
